

RADIATOR TEMPLATES by **MNPCTECH.com**

Within print dialog, be sure to select "None" for page scaling!

15MM FAN SPACING - HARDWARE LABS (BLACK ICE), SWIFTECH, THE FESER COMPANY, MAGICOOL

Some early Feser Xchangers had a fan spacing of 17mm. This was quickly corrected by Feser after complaints from the market, but some rads with 17mm spacing were released. If you have a 17mm-spaced Feser Xchanger, do not use this template!

Note: For triple or quad rads, you can print two of these and paste them together, creating a third or fourth fan for your template.
